Experience

Jio Platforms Limited Dec 2023 – Present

Software Developer *Onsite Mumbai*

- Built and deployed a full-stack web application for **tracking team member performance**, enabling managers to efficiently view, filter, sort, and modify monthly performance data, driving increased operational efficiency and data accuracy within the team.
- Implemented **cron** jobs and used **NodeMailer** to send weekly reports to the manager regarding team members' performance.
- Utilized MongoDB **aggregation pipelines** to perform complex queries and optimize data retrieval.
- Created highly customizable, reusable components in **React/Jetpack compose** for the JDS [**JioDesignSystem**] library.

Healthires July. 2023 – Dec 2023

Full stack developer *Remote, Bengaluru*

- Developed RestFul Apis for backend system.
- Used MongoDB **indexing to enhance query performance, resulting in a 60% reduction in query time.**
- Utilized **EJS (Embedded JavaScript) and nodemailer for generating and sending resumes to users upon signup**
- Developed and deployed a comprehensive full-stack admin panel dedicated to user management.
- Deployed backend infrastructure on AWS **(Amazon Web Services) and frontend on Firebase.**
- Configured **CloudWatch and WinstonLogger for logging and monitoring purposes.**

Projects

Devflow NextJS, MongoDB, Clerk, TypeScript, ShadCdn

- Successfully built DevFlow, **a Stack Overflow clone**, using Next.js with TypeScript and MongoDB.
- Implemented features including the ability to **ask questions**, **upvote/downvote** and **save questions**, **upvote/downvote answers**, **search questions by tags**, **global search**, **add code snippets**, and enable **authentication via Clerk.**
- Utilized **webhooks** to synchronize the database with authentication and employed **Next.js server actions** for enhanced functionality.

StudyNotion ReactJS, ExpressJS, MongoDb, TailwindCSS, RazorPay

- Developed an EdTech platform utilizing the MERN stack with **Razorpay** integration for seamless payment processing.
- Enabled dual user profiles **(Instructor and Student)** allowing instructors to create and manage courses with **Cloudinary** integration for media storage.
- Incorporated **Redux Toolkit** for efficient state management, enhancing scalability and maintainability
- Implemented **JWT authentication** and **authorization** to ensure secure access for users.

Technical Skills

Skills/Languages: JavaScript, TypeScript,Kotlin,Java,Data Structures and Algorithms
Technologies/Frameworks: GitHub, ReactJS, ReduxToolkit, NextJS, NodeJS, ExpressJS, , MongoDb, Tailwind, Jetpack Compose, TanstackQuery, Zustand

Freelance Project

SnipIT: Developed backend infrastructure for a news website using Node.js, Express.js, and Firebase, integrating **cron** jobs for scheduled tasks and external API integration with News API. Implemented RESTful APIs, role based **authentication** and **authorization**.

Education

[BE] Vasantdada Patil Pratishtans College of Engineering [MU] 2019 – 2023

CGPA: 8.89 *Mumbai,Maharashtra*
